# User Guide Manual

**Live deployed site: http://167.71.225.78:5173**

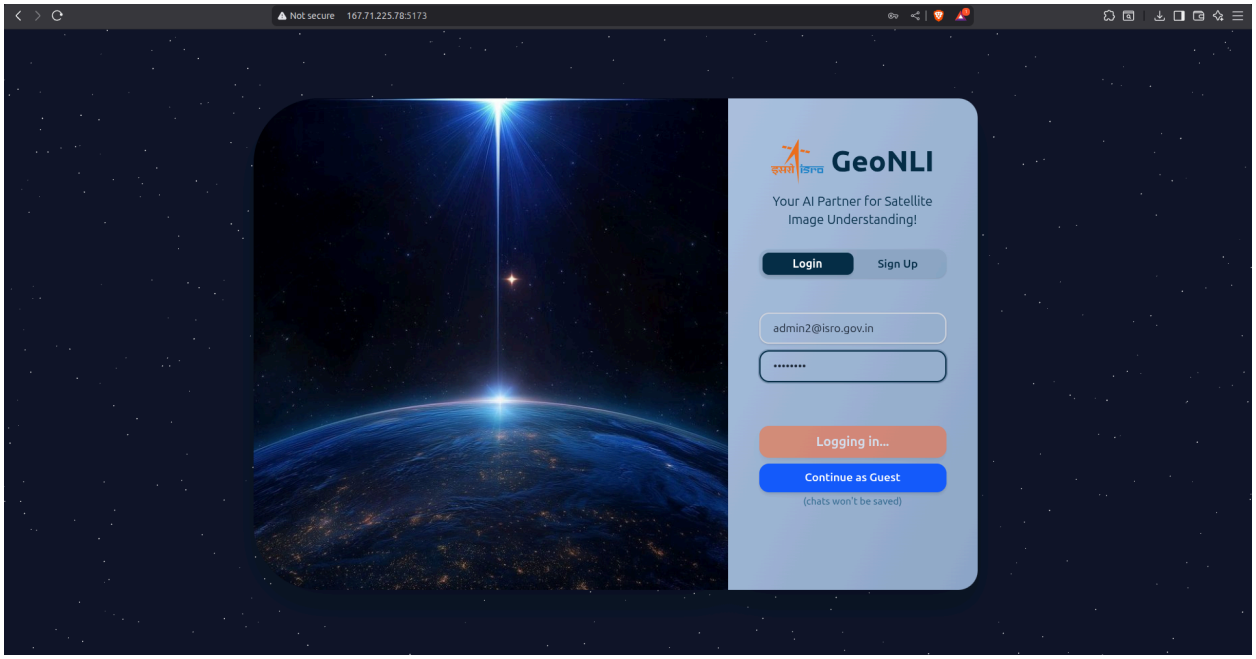

**For Admins:**

1. Deploy the platform using the guide provided at the root named `DEPLOYMENT_GUIDE.md`
2. After the deployment, signup on the frontend (port 5173) using the email ID: `admin@isro.gov.in` and any password with more than 6 characters on the signup page. (This email is whitelisted and given admin access at the initialization of the database)
3. Then you can see the chat screen, if you go to the bottom, you can see an admin dashboard where users can be added / whitelisted, roles can be changed from and to admin and User.

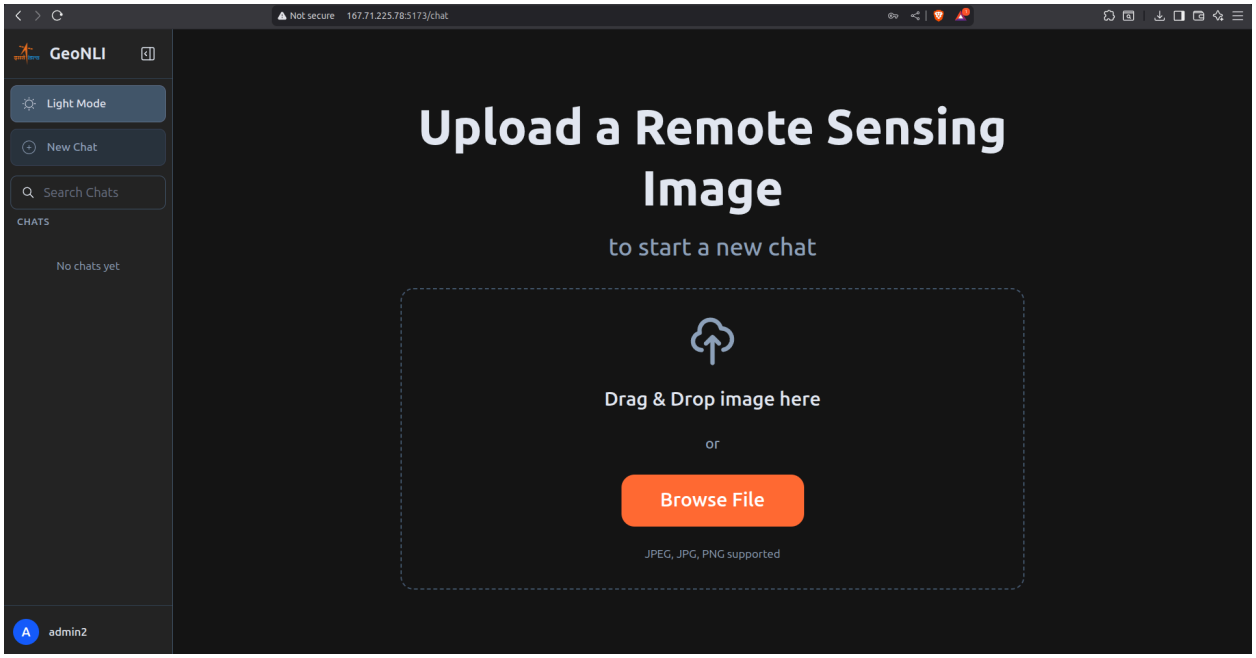

# Users of the platform:

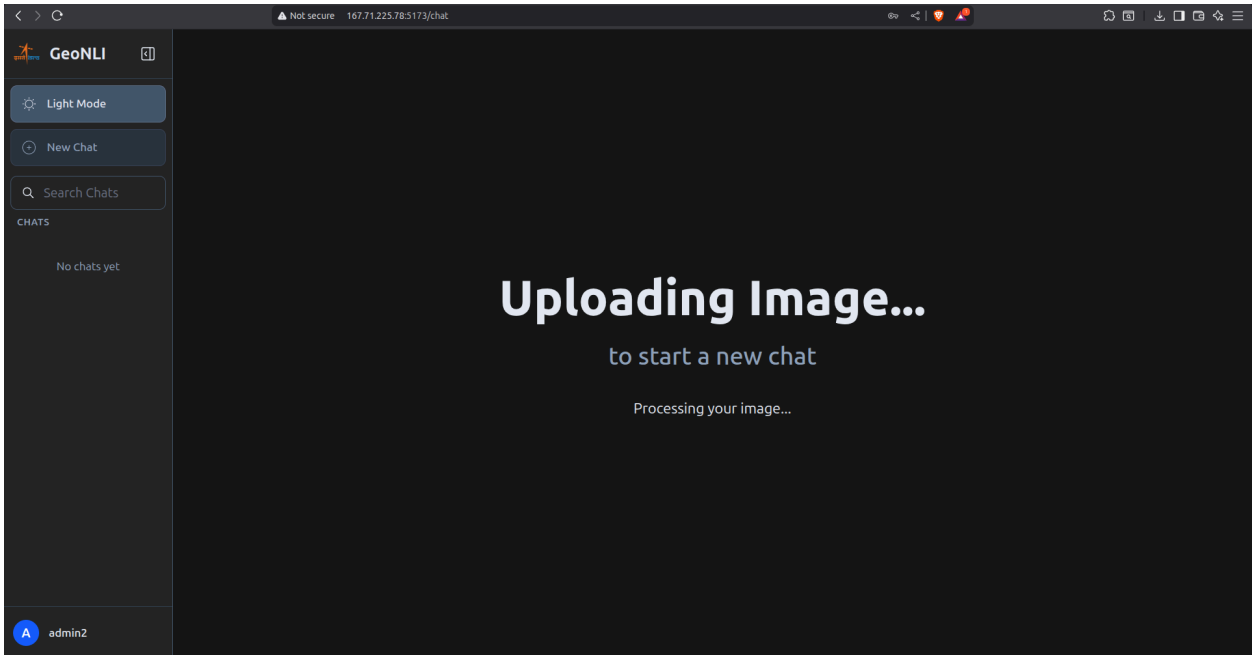

1. Create your Account on GeoNLI (have to be whitelisted by admin) using the signup page.

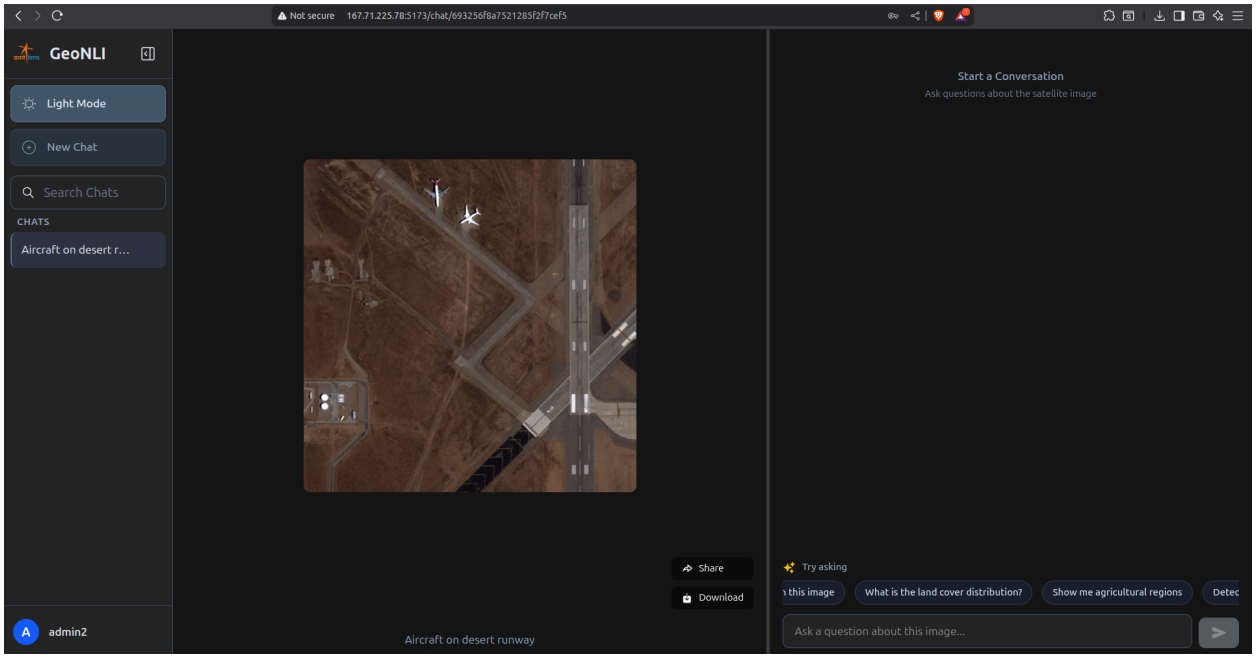

2. Or Login to GeoNLI if you're a returning user (or you can use the platform without login too, but won't be having access to your previous chats)

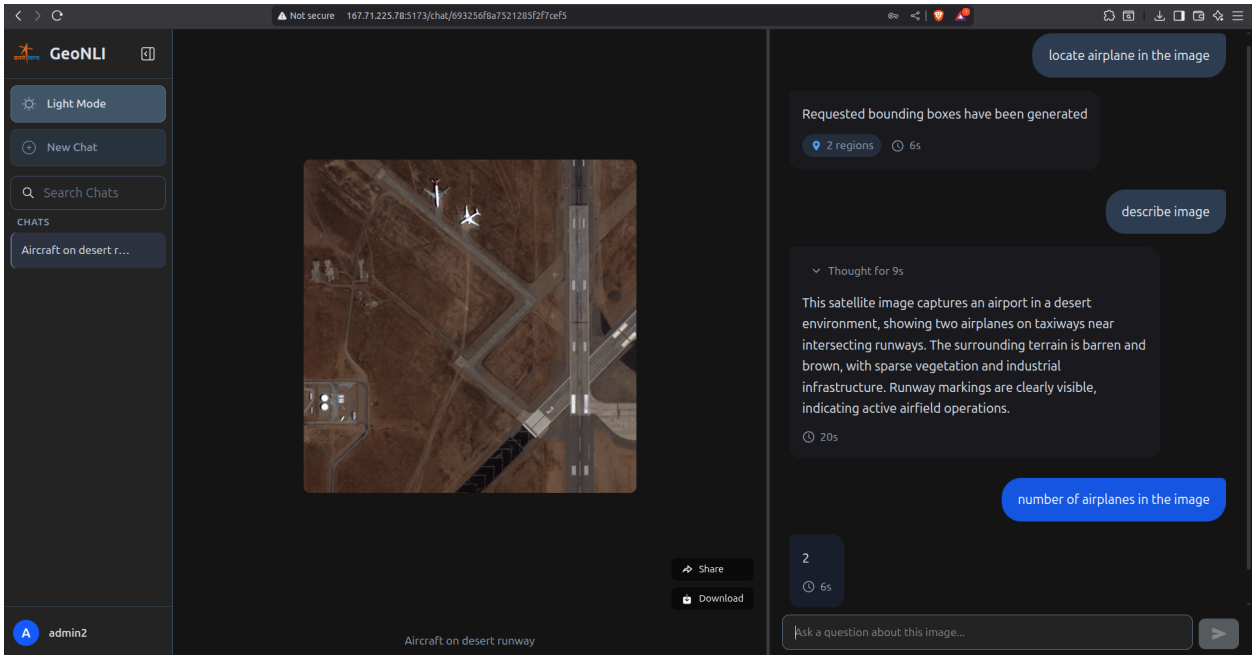

3.Upload a Satellite Image to create a new chat.

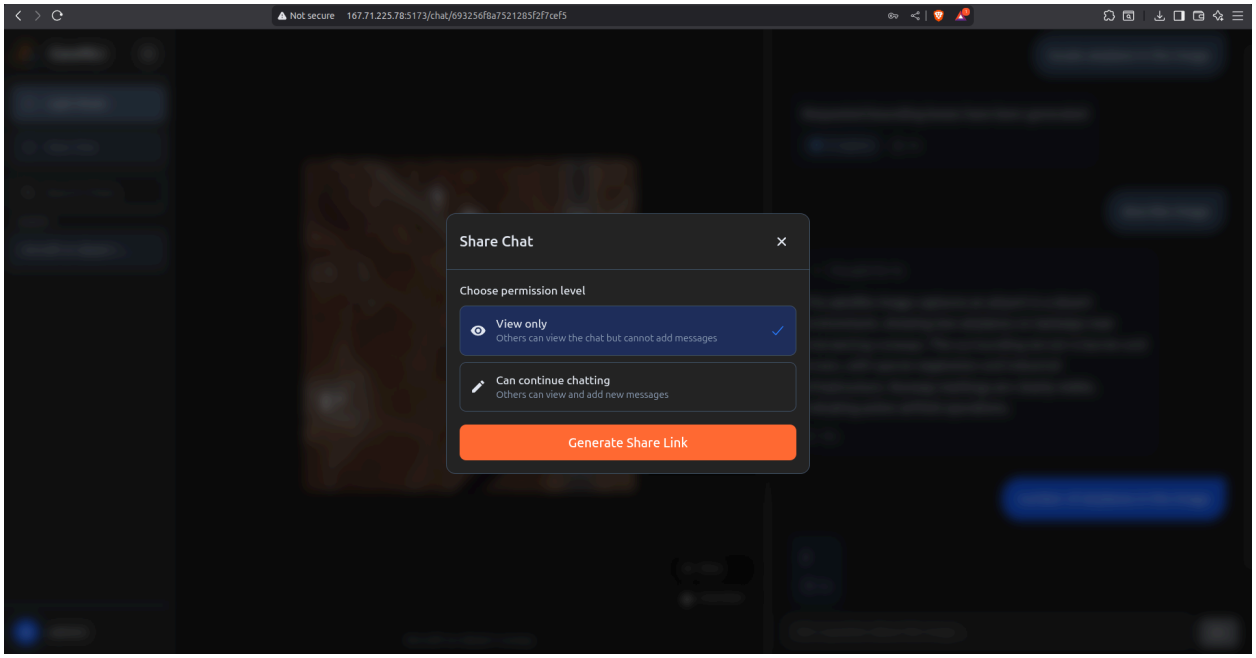

4. Wait for uploading of the Image.

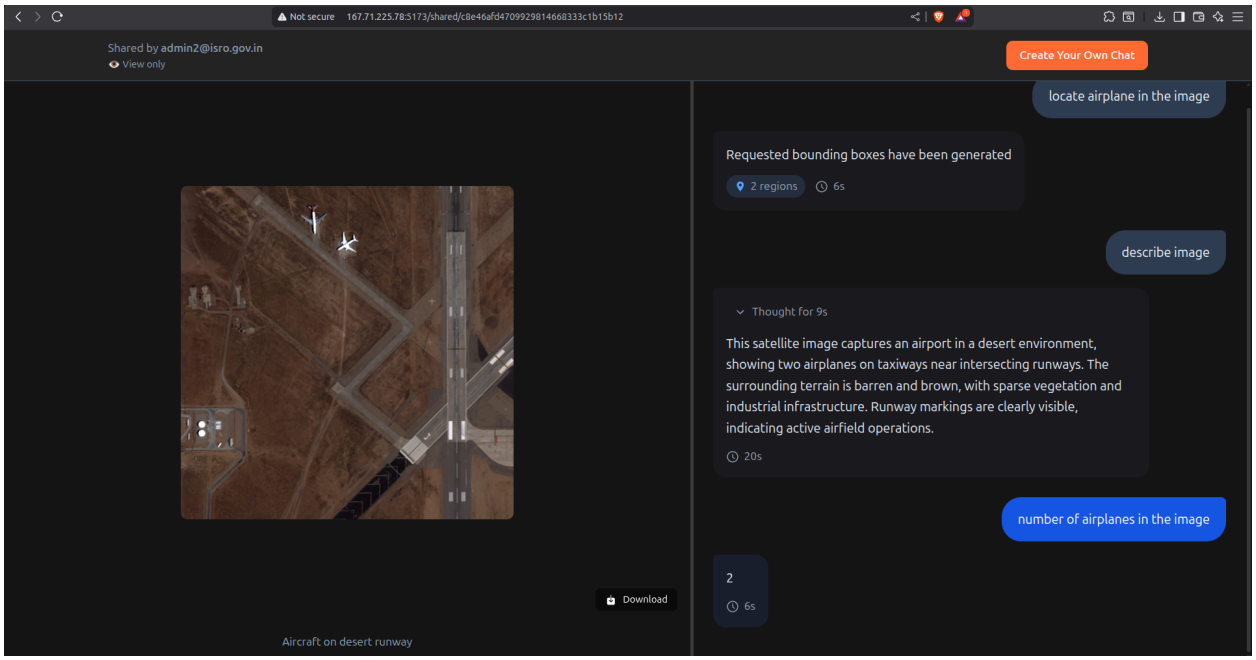

5. Give some query in the right chatbox or choose from (try asking) section.

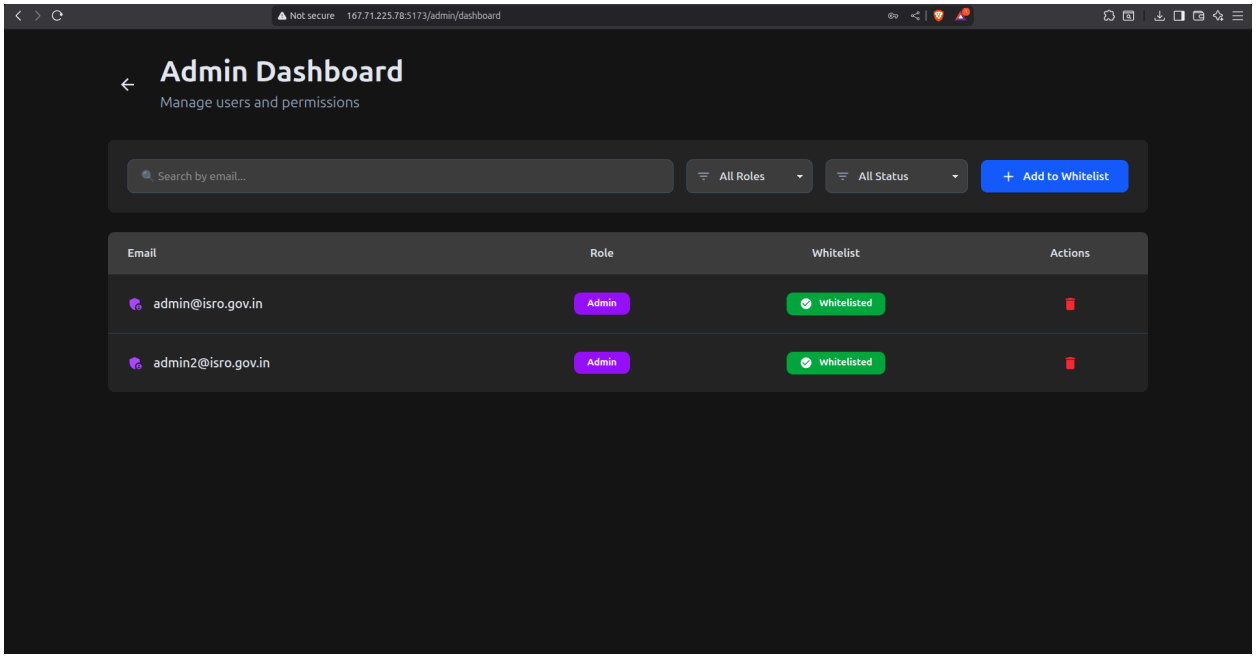

6. For example, you can ask VQA, Captioning or Grounding Query. The response will be either streaming through a beautiful UI or direct answer according to the category of the query.

7. Share feature (can provide edit or view permission).

8. Admin Dashboard for Admins (Have full control over User Management).
